|                              |  |                             |
|                              | Specifically, Michigan seeks to seamlessly connect the   |                             |
|                              |  |                             |

existing workforce IT systems within its agencies. This includes integrating unemployment insurance (UI), Wagner-Peyser employment services (ES), DW and other Title I Workforce Innovation and Opportunity Act (WIOA) program systems to simplify and enhance the claimant/jobseeker online experience. The integration of these systems will create a single point-of-entry, allowing for shared interface with an integrated sign-on and common registration, providing one avenue for customers seeking UI benefits and/or any other workforce services. Within a secure environment, common demographic and personal information used by all systems will be collected and then shared among the applicable state systems, eliminating duplicative data entry, streamlining the registration process; eliminating multiple user IDs, passwords and login processes for users; and reducing staff time in processing and reconciling user account information. Implementation also involves integrating the state's labor exchange system, Pure Michigan Talent Connect and the state's unemployment insurance Web Account Manager system. Additional state workforce related systems will be added in the future as part of complete WIOA implementation.
